Scottish Housing Quality Standard (SHQS) – Stock condition survey information (Indicator C24)

Please state:

C24.1 The date your organisation's stock was last surveyed or assessed for compliance with the SHQS

March 2019

C24.2 What percentage of stock did your organisation fully assess for compliance in the last four years?

100

C24.3 The date of your next scheduled stock condition survey or assessment

March 2020

C24.4 What percentage of your organisation's stock will be fully assessed in the next survey

100

C24.5 How did your organisation use the survey data stated at C24.2 to establish how the stock complied overall with the SHQS

Stock is surveyed on a continuing basis as properties become void or are having maintenance works carried out. The surveys focus on SHQS requirements. These surveys are recorded on individual SHQS property files which reflect the Scottish Government criteria for pass/fail/exempt/in abeyance. Compliance with SHQS is ensured by instructing on an ongoing basis any works deemed necessary to maintain the standards. A full external condition report of all properties is undertaken by a Consultant Architect. The last full survey was carried out in March 2014 and the next survey will be carried out during 2019/2020. The results of these surveys feed into future planned maintenance works to common areas which are carried out following consultation with sharing owners. An assessment of roof structures, roof coverings and rainwater goods is carried out on an annual basis by external contractors to ensure continued compliance.

Comments (Housing quality and maintenance)

Three properties did not have their gas safety certificate completed by the anniversary date during the reporting year. In all three cases this related to an identified weakness in the gas safety system. The details have been previously documented under notifiable events. System improvements have prevented any further such instances.
